Referring Physician.....	4

Overview

This document is provided to aid in an Alternate EVV Vendor’s integration efforts strictly relating to the Payer – Nebraska Total Care (Centene)

Please make sure you have reviewed Netsmart’s **Implementation Guide** as well as our **Rendered Services Data Dictionary**, which can always be found on the following site:

[Alternate EVV Vendor Integration](#)

If Alternate EVV Vendor elects to transmit XML, please refer to the Nebraska Total Care (Centene) specific **Typecode Data Dictionary** for all typecode values that must be transmitted for certain fields. Pipe-Delimited (.txt file) expected values are also listed in this document.

Expected Values

The below table presents expected values for certain fields, taken from the Rendered Services Data Dictionary. If Alternate EVV Vendor elects to transmit XML, please pay special attention to the typecode value

Rendered Service Field Name	Expected Value
Jurisdiction	NE XML typecode value = 27
Payer	CNNE XML typecode value = 501
Plan	NONE XML typecode value = 0
Program	(null) **do not send any value for this field**
DeliverySystem	FFFS XML typecode = 1

Service Codes and Modifiers

Below are the ServiceCodes and Modifiers in-scope for EVV

Note the three fieldnames that match the fieldnames on the Rendered Services Data Dictionary:

ServiceCode

ServiceCodeMod1

ServiceCodeMod2

ServiceCode	ServiceCodeMod1	ServiceCodeMod2	Unit-to-Hour	Round To	Rounding Breakpoint

Referring Physician

All COMPLETED visits must contain Referring Physician information, in order to prevent your Providers from performing additional tasks. Netsmart will not 'reject' transmissions that do not contain these values, as your Providers do have the ability to manually add these values in their Netsmart Provider Portal:

ReferringPhysicianFirstName

ReferringPhysicianLastName

ReferringPhysicianNpi

*Please note, all Providers admins have the ability to manually add Referring Physician values to their Recipients in their Netsmart Provider Portal in the event their Alternate EVV Vendor is not transmitting these fields.
